

SCHOOLS FOR THE FUTURE

The school environment is one of the toughest environments for all types of interior furniture. That is especially true of cabinets used in Food Technology & Food Prep rooms, wet play areas, lockers, staff rooms & classrooms. Steelplans' range of painted metal cabinets are designed specifically for these demanding areas. The inherent strength of steel means that our cabinets and doors can cope with the constant barrage of daily use by hundreds of pupils and staff alike.

This brochure is designed to give you a brief introduction to where Steelplan Kitchens can provide a solution to these rooms within schools & colleges.

"The school environment is one of the toughest for interior furniture..."

STEELPLAN KITCHENS

FOOD TECHNOLOGY ROOMS

We have extensive experience in Food Technology rooms in schools. As well as providing durable products for these heavily used environments, we can give guidance on room design & layout to optimize educational results. Teaching areas, disabled user areas, food prep areas, appliances, seating areas, wash/cook/study areas all fall into our area of expertise ensuring that you end up with a long lasting training area of high quality...

WET PLAY AREAS

Water, paint, crayon, chalk, ink - you name it kids use it. When it comes to wet play, these materials need to be easily removed. Steelplan have been designing and installing wet play areas for schools and nurseries for over 10 years. We manufacture a range of different height cabinets to suit children of all ages...

STAFF ROOMS & LOCKERS

The requirement for strong & durable cabinets isn't just reserved for students. It is equally essential for the staff areas, such as staff rooms and lockers....

CATERING KITCHENS

Our extensive knowledge also extends into the catering side of educational establishments. With our own range of *made to measure* stainless steel worktops & trestling, and experience of commercial grade cookware and washware, we can work with you from conception, design and manufacture to supply & installation....
